DETAILED ACTION

Status of the Application

Claims 1, 6 and 17 are pending.

Amendment of claim 17 and cancellation of claim 13 in a communication filed on 1/12/2005 is acknowledged.

Reasons for Allowance

1. The following is an Examiner's statement of reasons for allowance. Although the prior art discloses vectors comprising a nucleotide sequence encoding an $IgG(\kappa)$ or a trypsin secretory signal peptide, a polyhistidine tag, an enterokinase cleavage site, and a cloning site, the Examiner has found no teaching or suggestion in the prior art directed to a vector comprising these elements in the order recited in the claims, and in addition comprises a linker encoding amino acid residues 24-29 or 36-40 of SEQ ID NO: 19. Furthermore, the Examiner has found no teaching or suggestion in the prior art directed to an insect cell transformed with a vector comprising a nucleotide sequence encoding an $IgG(\kappa)$ or a trypsin secretory signal peptide, a polyhistidine tag, an enterokinase cleavage site, and a cloning site, in the order recited. While a mammalian cell transformed with such vector would have been obvious over the prior art (Invitrogen Catalog 1997), an insect cell transformed with such vector would not have been obvious over the prior art cited since one of skill in the art would not have been particularly motivated to transform an insect cell with a vector which comprises a nucleotide sequence encoding an $IgG(\kappa)$ or trypsin secretory signal peptide. Therefore, claims 1, 6 and 17 directed to (1) a vector comprising a nucleotide sequence encoding (i) an $IgG(\kappa)$ or a trypsin secretory signal peptide, (ii) a polyhistidine tag, (iii) amino acid residues 36-40 of SEQ ID NO: 19 (enterokinase cleavage site), and (iv) a cloning site, in the order recited, and further comprises a nucleotide sequence encoding a linker comprising amino acid residues 24-29 or 36-40 of SEQ ID NO: 19, and (2) insect cells transformed with a vector comprising a

Art Unit: 1652

nucleotide sequence encoding (i) an $IgG(\kappa)$ or a trypsin secretory signal peptide, (ii) a polyhistidine tag, (iii) amino acid residues 36-40 of SEQ ID NO: 19 (enterokinase cleavage site), and (iv) a cloning site, in the order recited, are allowable over the prior art of record.

Conclusion

- 2. Claims 1, 6 and 17 are allowed.
- 3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
- 4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Delia M. Ramirez whose telephone number is (571) 272-0938. The examiner can normally be reached on Monday-Friday from 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Ponnathapura Achutamurthy can be reached on (571) 272-0928. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571) 272-1600.
